

An introduction to Excel

In this 3.5-hour course we will look at customising Excel to make it work for you and explore how to produce professional documents that would not look out of place in any setting

1. Maintain, navigate, optimise and utilise Excel Effectively
2. Provide a launch pad for further personal learning
3. Garner a frame of mind that puts you in charge
4. An open Q & A session with our expert to answer your general I questions

The course is specifically designed for Windows 8.1 and office 2013 or below, if during the duration of the course a difference is found in the standard software or hardware set up you are using then please shout out, we will easily be able to find a work around for most situations.
